# **PRIMERS, FILLERS & SEALANTS**

# MICROMARMO PRIMER

Two-component, multifunctional, highly resistant, impeaching transparent protection of decorative finishes on floors and walls. It is the final protection of the MICROMARMO cycle, guarantees the floor an excellent resistance to wear and tear and perfect waterproof, it is also used as a consolidating and dustproof finish for industrial concrete floors. It can be used both inside and outside (Only Matt), as well as a protection of mural surfaces for precious decorative finishes (oxyd'arthe, rustyle).

# DOC PRIMER

DOC PRIMER is a water-born penetrating and consolidating fixative, based on special Nano-structured polymers, suitable for preliminary treatment of old, incoherent and absorbent mineral surfaces. DOC PRIMER is suitable for interior and exterior surfaces. It improves cohesion and absorption of the support, creating the ideal anchor and insulation from the alkaline environment.

# ONE PRIMER A+B

ONE PRIMER is a water-born 2-component epoxy-based primer, based on special epoxy-polyamide resins, suitable for multi-surface preliminary treatments. ONE PRIMER is suitable for interior multiple surfaces, such as countertops, wall, marble, ceramic, wood, MDF. It improves cohesion and absorption of the support, creating the ideal anchor and insulation.

# MINERAL PRIMER

MINERAL PRIMER is a water-based primer suitable for all kinds of lime based plaster finishes. Proper surface preparation is mandatory for a good finish. The composition of MINERAL PRIMER includes fine quartz sand, acrylic co-polymers and special additives, allowing adhesion on every surface. Its rough structure eases the application of the first coat of the plaster. MINERAL PRIMER is suitable for interior and exterior surfaces.

# DIAMOND FLOOR LEVEL A+B

Diamond Floor Level is a 2-component filling render for indoor and outdoor application. Based on resins, special additives and selected inserts, along with the True Cement mix, Diamond Floor Level is the suitable prep-coat for the Diamond Floor System. Easy to apply, with outstanding mechanical resistance, Diamond Floor System prevents micro-cracks and levels tiled floors and walls and countertops. Diamond Floor Level can be used over concrete, marble, tiled surfaces (along with alkali-resistant mesh if needed).

# TOP FLEX-ONE

Top Flex is a mono component waterproof membrane with excellent elasticity.

A ready to use paste, it can easily be left exposed as it has excellent resistance to atmospheric agents. The system is compatible with multiple substrates and is environment friendly and Low VOC.

An extremely useful system that can be used to:

- Waterproof terraces and balconies
- Waterproof concrete walls
- Provide anti crack coating for restoration of micro cracked plasters.
- Waterproof metal sheets and wooden roofs.
- Prevent opening of substrate joints or substrate to substrate joints.

# DIAMOND SEALER

DIAMOND SEALER 2 is a component protective coating System, A+B protective Sealer for floors, walls and countertops. It has outstanding physical and mechanical features and excellent resistance to solvents and cleaning solutions for domestic and industrial use, mineral and vegetable oils, fuels.

Diamond is available in matt and gloss variants.

# IDRO SEALER

IDRO SEALER is a clear penetrating water-born water/oil repellent topcoat, based on special acrylic and polyurethane polymers, suitable for the treatment of interior and exterior surfaces, under any environmental conditions. IDRO SEALER can be applied to any kind of mineral support, including bare concrete, reinforced and cellular concrete, sandy or calcareous stone, bricks and lime plasters.

# MATT/GLOSS PROTECTOR 2K

Two-component, multifunctional, highly resistant, impeaching transparent protection of decorative finishes on floors and walls. MATT/GLOSS PROTECTOR is the final protection of the MICROMARMO cycle, guarantees the floor an excellent resistance to wear and tear and perfect waterproof, it is also used as a consolidating and dustproof finish for industrial concrete floors. It can be used both inside and outside (Only Matt), as well as a protection of mural surfaces for the protection of precious decorative finishes (OXYD'ARTHE, RUSTYLE), and murals.

# METAL WAX

METAL WAX is water based decorative topcoat suitable for smooth lime based -niches (Venetian plasters and Marmorino of all grain size). METAL WAX is based on genuine bee's wax, Marseille's soap, emollients, and extra fine metallic powder.

# NATURAL WAX

NATURAL WAX is water based anti-dirt protector suitable for smooth lime based finishes (Venetian plasters and Marmorino of all grain size). NATURAL WAX is based on genuine bee's wax, Marseille's soap, emollients and special additives. Its purpose is to protect and allow the cleaning of the surface, enhance the finish sheen and maintain its breathability. NATURAL WAX is suitable as a topcoat of internal surfaces.

# MICA

MICA is a synthetic mica (uorphlogopite) additive for lime-based -niches. MICA has an outstanding resistance to lime environment thanks to the high chemical stability. MICA is available in 3 options: GOLD, SILVER, and BRONZE.
